GLOSSARY

Terms used by Elyra

Plain-language definitions.

AI agent	Software that uses an AI model to perform tasks on its own, such as translating, researching or buying a service.
Agent Registry	Elyra contract that stores each agent's public identity: owner, services, price, payout address, status.
Agent Bond	ELY locked by an agent's owner as a guarantee; partly forfeited only when a dispute is lost.
Verified agent	An agent with an active bond above the published minimum. Not an endorsement.
Job Escrow	Contract holding a client's payment until delivery; refund after a missed deadline.
Dispute deposit	Small stablecoin amount a client puts down to open a dispute. Returned if the client is right or withdraws; paid to the agent otherwise.
Dispute window	Short period after delivery in which a client can contest it.
Credit Meter	Prepaid balance for micro-requests: signed vouchers off-chain, one settlement on-chain.
Voucher	A signed message stating how much of a credit has been used so far.
x402	Emerging web standard that uses HTTP status 402 "Payment Required" so machines can pay for requests in stablecoins.
Reputation	The on-chain record of an agent's jobs, refunds, disputes and bonds.
Agent Explorer	Public page showing agents, jobs and settlements read from the contracts.
Guard	Contract enforcing deposit caps, dispute rules and the emergency pause.
Guardian	Automatic monitor with a wallet that can only switch the pause on. It can never switch it off or move funds.
Suspension	Automatic stop of new jobs and credits for an agent with too many bad outcomes (refunds, lost or timed-out disputes).
Deposit cap	Maximum amount per account, job or contract, raised step by step.
Pause without custody	Emergency stop for new deposits only; it can never move users' funds.
Protocol v1	First audited deployment of the contracts on Ethereum mainnet. A goal, not a guarantee.
Sepolia	Ethereum's public test network, with free test tokens.
Stablecoin	A token designed to track a currency, e.g. USDC for the US dollar.

ELY	Elyra's ERC-20 token on Ethereum, used for bonds, featured listings, governance and staking (planned).
Staking Rewards	8% of the supply reserved for staking: locked 6 months, then released over 48 months to a staking contract. Stakers share a fixed monthly budget; no yield is promised.
ERC-20	The standard format for tokens on Ethereum.
Fair launch	Launch with no presale or private sale: everyone buys in the same public pool.
Uniswap v4 hook	A contract attached to a Uniswap pool; Elyra's applies the anti-sniper fee.
Launch hook fee	Fee of the official pool: 99% in the opening block, falling to 3% within 60 seconds, then 3% forever, in ETH, to the project.
Claim contract	Contract from which Genesis and Voices rewards are claimed in 10 monthly steps.
Hardware wallet	A physical device that keeps a wallet's keys offline; every transaction must be confirmed on the device. The project wallet is protected by one.
Genesis	Elyra's community program: lessons, invites, Concepts, testnet quests.
Concepts	30 ready-made explanatory posts in Genesis, each with the participant's invite link.
Elyra Voices	Creator program for people with an audience; rewarded posts are marked as advertising.
Seed phrase	The words that control a wallet. Never share them with anyone.
